"OPEN TOOLS FOR FARMING COMMUNITIES"
An affordable, multipurpose platform with applications adapted for organic and polyculture farms. Capable of acquiring detailed information for a large variety of crops and producing a multi-scalar picture of crop development, helping farming communities to monitor their crops, increase their production and improve working conditions.
"OPEN TOOLS FOR FARMING COMMUNITIES"
Robotics for Micro Farms.

An affordable, multipurpose platform with applications adapted for organic and polyculture farms. Capable of acquiring detailed information for a large variety of crops and producing a multi-scalar picture of crop development, helping farming communities to monitor their crops, increase their production and improve working conditions.
